Enterprise Android Engineer | Hardware-Integrated Mobile Systems

SUMMARY

Android engineer specializing in enterprise mobile systems that connect Android applications and tablets with printers, scanners, payment terminals, and store networks. Strong in Kotlin/Java modernization, hardware SDK/API integration, device troubleshooting, observability, and production rollout reliability.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL
Android/Mobile: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, React Native
Systems/Tools: Hardware SDK/API Integration, NanoHttpd, Local Networking, Jenkins, Azure DevOps, Firebase, Splunk, Git

EXPERIENCE

- Staples · Software Engineer II, Mobile**
Framingham, MA

Oct. 2022 - Present

 - Owned Android architecture and primary implementation for a self-serve print application modernization from Java/Android 7 to Kotlin/Android 13, improving maintainability while enabling multilingual, Google Drive, and Dropbox integrations.
 - Delivered hardware-integrated Android workflows across Xerox printer ecosystems, external payment terminals, PIN pads, scanners, and store network environments for enterprise retail deployments across 500 - 1,000 locations.
 - Implemented contactless payment support for Apple Pay and Google Pay and helped deliver a four-step local PIN pad upgrade process with zero production failures across 800+ retail locations.
 - Built a real-time printer status light monitoring system integrated with Splunk, delivering dashboards for issue duration and frequency to accelerate hardware troubleshooting and management visibility.
 - Supported production troubleshooting across printers, PIN pads, payment flows, and local device ecosystems in collaboration with QA, field technicians, vendor support, and management.
- General Motors · Sr. Mobile Device Software Developer**
Remote

Jul. 2021 - Jul. 2022

 - Built a web dashboard to track Android and iOS app sizes, integrated Jenkins build pipeline data, and deployed build/release pipelines in Azure DevOps for mobile platform visibility.
 - Created a Universal Deep Link Handler in React Native to consolidate deep link management, improve user flow, and simplify future mobile development.
- Syntax Tutoring · Founder and CEO**
Foxborough, MA

Aug. 2021 - Jan. 2024

 - Founded a programming tutoring company and designed practical web and Android curricula, interactive Android test applications, lectures, and hands-on lab assignments.

PROJECTS

- Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData**
 - Built the company's first Kotlin Android application with a self-hosted local server on a tablet and scanner for POS barcode automation; automated 65 test cases, improved POS automation by 55%, and won first place in the 2025 company Hackathon.
- Split.It | React, Ionic Capacitor, Groq API, AI, Tesseract.js, Firebase**
 - Built a cross-platform receipt-splitting mobile app with OCR receipt scanning, Groq API data extraction, Firebase backend services, and a native-style Android/iOS experience from one codebase.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science

Dean's List Recipient
