Android Medical Device / Enterprise Device Software Engineer

SUMMARY

Android engineer positioned for healthcare-device and specialized-hardware roles that require reliable device communication, production stability, observability, and maintainable application architecture. Experience is strongest at the application and hardware SDK/API integration layer, with practical troubleshooting near the hardware/software boundary.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL

Android/Mobile: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, React Native

Reliability/Systems: Hardware SDK/API Integration, Device Monitoring, Local Networking, Splunk, Jenkins, Azure DevOps, Firebase, Git

EXPERIENCE

Staples · Software Engineer II, Mobile

Oct. 2022 - Present

Framingham, MA

- Owned Android modernization from Java/Android 7 to Kotlin/Android 13 for a hardware-integrated application, improving maintainability and reliability across self-serve device workflows.
- Integrated Android workflows with specialized device ecosystems including Xerox printers, payment terminals, PIN pads, scanners, and store network infrastructure across enterprise retail deployments.
- Helped deliver a staged local PIN pad update process with zero production failures across 800+ locations, demonstrating risk-aware rollout planning for constrained field devices.
- Built real-time hardware status monitoring with Splunk dashboards that surfaced issue duration and frequency, improving visibility into device health and operational reliability.
- Collaborated with QA, field technicians, vendor support, and management to diagnose production hardware/application issues and translate device signals into actionable fixes.

General Motors · Sr. Mobile Device Software Developer

Jul. 2021 - Jul. 2022

Remote

- Built a web dashboard to track Android and iOS app sizes, integrated Jenkins build pipeline data, and deployed build/release pipelines in Azure DevOps for mobile platform visibility.
- Created a Universal Deep Link Handler in React Native to consolidate deep link management, improve user flow, and simplify future mobile development.

Syntax Tutoring · Founder and CEO

Aug. 2021 - Jan. 2024

Foxborough, MA

- Founded a programming tutoring company and designed practical web and Android curricula, interactive Android test applications, lectures, and hands-on lab assignments.

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a self-hosted local server on a tablet and scanner for POS barcode automation; automated 65 test cases, improved POS automation by 55%, and won first place in the 2025 company Hackathon.

Split.It | React, Ionic Capacitor, Groq API, AI, Tesseract.js, Firebase

- Built a cross-platform receipt-splitting mobile app with OCR receipt scanning, Groq API data extraction, Firebase backend services, and a native-style Android/iOS experience from one codebase.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science

Dean's List Recipient
