Lead Mobile Engineer | Technical Ownership & Enterprise Android

SUMMARY

Mobile engineer positioned for senior ownership roles requiring independent delivery, cross-functional collaboration, and end-to-end Android systems thinking. Strongest in enterprise Android modernization, hardware-integrated workflows, production reliability, automation, observability, and mentoring-oriented technical leadership.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL
Mobile Architecture: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, React Native
Ownership/Systems: Hardware SDK/API Integration, Jenkins, Azure DevOps, Firebase, Splunk, NanoHttpd, Local Networking, Git

EXPERIENCE

Staples · Software Engineer II, Mobile Framingham, MA	Oct. 2022 - Present
- Owned architecture and primary implementation for a full Android modernization from Java/Android 7 to Kotlin/Android 13, enabling multilingual support, cloud integrations, and long-term maintainability. - Led delivery of contactless payment functionality and supported a four-step local PIN pad upgrade process that reached 800+ retail locations with zero production failures. - Built real-time printer status light monitoring integrated with Splunk, turning hardware signals into operational dashboards used to understand issue duration and frequency. - Drove production troubleshooting across printers, scanners, PIN pads, payment flows, and local store networks in partnership with QA, field technicians, vendor support, and management. - Delivered independently across architecture, implementation, debugging, deployment support, and maintenance for enterprise Android systems used in physical retail environments.	
General Motors · Sr. Mobile Device Software Developer Remote	Jul. 2021 - Jul. 2022
- Built a web dashboard to track Android and iOS app sizes, integrated Jenkins build pipeline data, and deployed build/release pipelines in Azure DevOps for mobile platform visibility. - Created a Universal Deep Link Handler in React Native to consolidate deep link management, improve user flow, and simplify future mobile development.	
Syntax Tutoring · Founder and CEO Foxborough, MA	Aug. 2021 - Jan. 2024
Founded a programming tutoring company, created Android/web curricula, built interactive Android learning applications, and coached students through project-based software development.	

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a self-hosted local server on a tablet and scanner for POS barcode automation; automated 65 test cases, improved POS automation by 55%, and won first place in the 2025 company Hackathon.

Split.It | React, Ionic Capacitor, Groq API, AI, Tesseract.js, Firebase

- Built a cross-platform receipt-splitting mobile app with OCR receipt scanning, Groq API data extraction, Firebase backend services, and a native-style Android/iOS experience from one codebase.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science	Dean's List Recipient
