Mobile Engineer | Android, AI Integration & Product Systems

SUMMARY

Mobile engineer with Android/Kotlin production experience and practical AI/OCR feature integration across cross-platform product systems. Strong fit for roles combining mobile architecture, Firebase-backed application logic, OCR/data extraction, internal tooling, and enterprise Android ownership.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL
Mobile: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, React Native, Ionic Capacitor, Gradle, Firebase
AI/Platform: Groq API, Tesseract.js, OCR, Cloud Functions, Firestore, Jenkins, Azure DevOps, Splunk, NanoHttpd

EXPERIENCE

Staples · Software Engineer II, Mobile Oct. 2022 - Present
Framingham, MA

- Owned Android architecture and primary implementation for Java/Android 7 to Kotlin/Android 13 modernization, improving maintainability and enabling multilingual and cloud-storage integrations.
- Delivered production Android features across contactless payments, PIN pad updates, printer workflows, and Splunk-based device monitoring for enterprise retail environments.
- Implemented Apple Pay/Google Pay support and helped deliver a staged local PIN pad update process with zero production failures across 800+ retail locations.
- Built real-time printer status light monitoring dashboards in Splunk, surfacing hardware issue duration and frequency for faster production troubleshooting.
- Integrated mobile applications with cloud services, APIs, and operational tooling while collaborating with QA, field technicians, vendor support, and management.

General Motors · Sr. Mobile Device Software Developer Jul. 2021 - Jul. 2022
Remote

- Built a web dashboard to track Android and iOS app sizes, integrated Jenkins build pipeline data, and deployed build/release pipelines in Azure DevOps for mobile platform visibility.
- Created a Universal Deep Link Handler in React Native to consolidate deep link management, improve user flow, and simplify future mobile development.

Syntax Tutoring · Founder and CEO Aug. 2021 - Jan. 2024
Foxborough, MA

- Founded a programming tutoring company and designed practical web and Android curricula, interactive Android test applications, lectures, and hands-on lab assignments.

PROJECTS

Split.It | React, Ionic Capacitor, Groq API, AI, Tesseract.js, Firebase

- Built a cross-platform receipt-splitting mobile app with OCR receipt scanning, Groq API data extraction, Firebase backend services, and a native-style Android/iOS experience from one codebase.

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a self-hosted local server on a tablet and scanner for POS barcode automation; automated 65 test cases, improved POS automation by 55%, and won first place in the 2025 company Hackathon.

Yardscape | Kotlin, Java, MVVM, Coroutines, Volley, Firebase

- Engineered an Android marketplace application using Java, Kotlin, MVVM, Firebase authentication/storage, and API-backed listing workflows for browsing and posting yard sale listings.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science Dean's List Recipient
