Android Payments / POS Device Integration Engineer

SUMMARY

Android engineer with production experience across contactless payments, PIN pads, POS scanner automation, printers, and store device ecosystems. Strong fit for payment terminal, retail device, POS, and enterprise Android roles requiring Kotlin/Java ownership, hardware-adjacent troubleshooting, and reliable rollout execution.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL

Android/Mobile: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, React Native

Payments/Devices: Apple Pay, Google Pay, NFC/Tap-to-Pay, PIN Pads, Ingenico Lane 3000, Verifone, POS Scanners, Splunk, Jenkins

EXPERIENCE

Staples · Software Engineer II, Mobile

Oct. 2022 - Present

Framingham, MA

- Implemented contactless payment support for Apple Pay and Google Pay within an enterprise Android retail application, integrating external payment terminal workflows into production store environments.
- Helped design and deliver a four-step local PIN pad upgrade process for Ingenico/Verifone-style device ecosystems, eliminating on-site technician visits and achieving zero production failures across 800+ retail locations.
- Modernized a high-traffic Android application from Java/Android 7 to Kotlin/Android 13 while preserving reliability across payment, print, scanner, and store-network workflows.
- Built a real-time printer status light monitoring system in Splunk, giving technical teams and management visibility into hardware issue duration, frequency, and operational impact.
- Troubleshot production payment and device issues across PIN pads, printers, scanners, and local store networks in partnership with QA, field technicians, and vendor support.

General Motors · Sr. Mobile Device Software Developer

Jul. 2021 - Jul. 2022

Remote

- Built a web dashboard to track Android and iOS app sizes, integrated Jenkins build pipeline data, and deployed build/release pipelines in Azure DevOps for mobile platform visibility.
- Created a Universal Deep Link Handler in React Native to consolidate deep link management, improve user flow, and simplify future mobile development.

Syntax Tutoring · Founder and CEO

Aug. 2021 - Jan. 2024

Foxborough, MA

- Founded a programming tutoring company and designed practical web and Android curricula, interactive Android test applications, lectures, and hands-on lab assignments.

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a self-hosted local server on a tablet and scanner for POS barcode automation; automated 65 test cases, improved POS automation by 55%, and won first place in the 2025 company Hackathon.

Split.It | React, Ionic Capacitor, Groq API, AI, Tesseract.js, Firebase

- Built a cross-platform receipt-splitting mobile app with OCR receipt scanning, Groq API data extraction, Firebase backend services, and a native-style Android/iOS experience from one codebase.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science

Dean's List Recipient
