Senior Android Engineer | Kotlin, Architecture & Mobile Platform

SUMMARY

Senior Android engineer with experience modernizing Java/Android 7 systems to Kotlin/Android 13, building maintainable mobile architecture, and supporting enterprise-scale production applications. Brings Android app ownership, CI/CD awareness, observability, and practical device-integration experience beyond consumer UI work.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL

Android: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, Firebase

Platform/Tools: Jenkins, Azure DevOps, Splunk, React Native, NanoHttpd, API Integration, Git, Mobile Observability

EXPERIENCE

Staples · Software Engineer II, Mobile

Oct. 2022 - Present

Framingham, MA

- Owned architecture and primary implementation for full Android modernization from Java/Android 7 to Kotlin/Android 13, improving maintainability for a high-traffic enterprise retail application.
- Enabled multilingual support, Google Drive/Dropbox integrations, contactless payment flows, and hardware-integrated workflows while maintaining production reliability across distributed retail deployments.
- Implemented Apple Pay and Google Pay support and helped deliver a local PIN pad upgrade process with zero production failures across 800+ retail locations.
- Built a real-time printer status light monitoring system integrated with Splunk dashboards for issue duration, frequency, and faster production troubleshooting.
- Collaborated across QA, field technicians, vendor support, and management to own feature implementation, debugging, deployment support, and ongoing maintainability.

General Motors · Sr. Mobile Device Software Developer

Jul. 2021 - Jul. 2022

Remote

- Built a web dashboard to track Android and iOS app sizes, integrated Jenkins build pipeline data, and deployed build/release pipelines in Azure DevOps for mobile platform visibility.
- Created a Universal Deep Link Handler in React Native to consolidate deep link management, improve user flow, and simplify future mobile development.

Syntax Tutoring · Founder and CEO

Aug. 2021 - Jan. 2024

Foxborough, MA

- Founded a programming tutoring company and designed practical web and Android curricula, interactive Android test applications, lectures, and hands-on lab assignments.

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a self-hosted local server on a tablet and scanner for POS barcode automation; automated 65 test cases, improved POS automation by 55%, and won first place in the 2025 company Hackathon.

Split.It | React, Ionic Capacitor, Groq API, AI, Tesseract.js, Firebase

- Built a cross-platform receipt-splitting mobile app with OCR receipt scanning, Groq API data extraction, Firebase backend services, and a native-style Android/iOS experience from one codebase.

Yardscape | Kotlin, Java, MVVM, Coroutines, Volley, Firebase

- Engineered an Android marketplace application using Java, Kotlin, MVVM, Firebase authentication/storage, and API-backed listing workflows for browsing and posting yard sale listings.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science

Dean's List Recipient
