TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL, HTML/CSS

Frameworks/APIs: Jetpack Compose, Coroutines, LiveData, NanoHttpd, RxJava, Retrofit, Gradle, React Native, Node.js, Jenkins, Firebase, Splunk

EXPERIENCE

Software Engineer II, Mobile

October. 2022 - Present

Staples

Framingham, MA

- Developed architecture and primary implementation of full Android modernization (Java/Android 7 to Kotlin/Android 13), enabling multilingual support, Google Drive/Dropbox integrations, and improved maintainability for a high-traffic retail application.
- Led the implementation of a contactless payment solution, enabling tap-to-pay functionality and supporting Apple Pay and Google Pay, while developing a local PIN pad update process that eliminated the need for on-site technician visits, driving significant cost savings across retail locations.
- Built real-time printer status light monitoring system integrated with Splunk; delivered analytics dashboards showing issue duration and frequency, driving faster resolution and informing of hardware issues to management.

Sr. Mobile Device Software Developer

July. 2021 - July. 2022

General Motors

Remote

- Pioneered the development of a web-based dashboard to track Android and iOS app sizes, integrating Jenkins build pipelines to send app size data and deploying build and release pipelines in Azure DevOps.
- Streamlined deep link management by creating the Universal Deep Link Handler in React Native, consolidating deep links into a cohesive system within the application, enhancing user flow and simplifying future development.

Founder and CEO

August. 2021 - January. 2024

Syntax Tutoring

Foxborough, MA

- Established a computer programming tutoring company, designing comprehensive curricula for web and Android development.
- Developed interactive Android test applications to provide a hands-on learning experience.
- Provided personalized tutoring sessions, guiding students through the process of creating their own applications and conducting engaging lectures with practical lab assignments to facilitate skill development.

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application using LiveData, Coroutines, and NanoHttpd to self-host a local server on a tablet with a scanner for POS barcode automation, allowing 65 test cases to be automated, boosting POS automation by 55%, and earning first place in the company's 2025 Hackathon.

TabTally | Kotlin Multiplatform, Compose Multiplatform, Koin, Ktor, OCR.space, Qwen | [Project Link](#)

- Developed TabTally, a Kotlin Multiplatform and Compose Multiplatform application for Android and iOS that combines Koin and Ktor shared logic with Kamel and Peekaboo image handling, OCR.space, and Hugging Face/Qwen processing to extract and split restaurant receipts.

SmartShopper | Custom GPT, Prompt Engineering, Web Research | [Project Link](#)

- Designed and deployed a custom GPT shopping assistant that researches products and personalizes recommendations across budget, material, fit, style, seller reputation, ratings, review volume, and retailer availability.
- Built a reusable workflow for targeted clarification, budget/mid-tier/premium comparisons, purchase-ready links, and value-tradeoff analysis across clothing, electronics, home improvement, cookware, and hardware.

Yardscape | Kotlin, Java, MVVM, Coroutines Volley, Firebase

- Engineered an Android yard-sale marketplace with Java, Kotlin, MVVM, Coroutines, Volley, and Firebase for authentication, cloud listing storage, and browsing and publishing workflows.

EDUCATION

University of Massachusetts, Lowell
Bachelor of Science in Computer Science

Lowell, MA
Dean's List Recipient
