Android Medical Device / Enterprise Device Software Engineer

SUMMARY

Android engineer suited to specialized-device roles that require dependable communication, production stability, observability, and maintainable application architecture. Experience is strongest at the application and hardware SDK/API integration layer.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL

Android/Mobile: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, React Native

Reliability/Systems: Hardware SDK/API Integration, Device Monitoring, Local Networking, Splunk, Jenkins, Azure DevOps, Firebase, Git

EXPERIENCE

Staples · Software Engineer II, Mobile

Oct. 2022 - Present

Framingham, MA

- Owned Android architecture and primary implementation for modernizing a self-service print application from Java on Android 7 to Kotlin on Android 13, enabling multilingual, Google Drive, and Dropbox workflows.
- Integrated Android workflows with Xerox printers, payment terminals, PIN pads, scanners, and store-network infrastructure across enterprise retail deployments.
- Implemented Apple Pay and Google Pay support and helped design a four-stage local update for bank-mandated payment-terminal software. The process brought vendor-technician cost for the rollout to \$0 and reached 800+ locations with zero production failures.
- Built real-time hardware status monitoring with Splunk dashboards that exposed issue duration and frequency for faster device diagnosis.

General Motors · Sr. Mobile Device Software Developer

Jul. 2021 - Jul. 2022

Remote

- Built a web dashboard that used Jenkins pipeline data to track Android and iOS app-size changes, and deployed mobile build and release pipelines in Azure DevOps.
- Created a Universal Deep Link Handler in React Native to consolidate routing, improve user flow, and make future mobile development easier.

Syntax Tutoring · Founder and CEO

Aug. 2021 - Jan. 2024

Foxborough, MA

- Founded a programming tutoring company and designed practical Android and web curricula, interactive applications, lectures, and hands-on labs.

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a tablet-hosted local server and physical scanner; automated 65 POS tests, increased POS automation by 55%, and won first place in the 2025 company hackathon.

TabTally | Kotlin Multiplatform, Compose Multiplatform, ML Kit, Vision, Groq, SQLDelight

- Designed and built a shared Android and iOS receipt-splitting product with on-device OCR, strict-schema AI extraction, editable review, and deterministic split calculation.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science

Dean's List Recipient
