Android Payments / POS Device Integration Engineer

SUMMARY

Android engineer with production experience across contactless payments, PIN pads, POS scanner automation, printers, and store devices. Strong in Kotlin/Java ownership, hardware-adjacent troubleshooting, and careful rollout execution.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, Swift, Python, C#, C++, C, SQL

Android/Mobile: Android SDK, Jetpack Compose, Coroutines, MVVM, LiveData, RxJava, Retrofit, Gradle, React Native

Payments/Devices: Apple Pay, Google Pay, NFC, PIN Pads, Ingenico Lane 3000, Verifone, POS Scanners, Splunk, Jenkins

EXPERIENCE

Staples · Software Engineer II, Mobile

Oct. 2022 - Present

Framingham, MA

- Implemented Apple Pay and Google Pay support within an enterprise Android application and integrated external payment-terminal workflows into production stores.
- Implemented Apple Pay and Google Pay support and helped design a four-stage local update for bank-mandated payment-terminal software. The process brought vendor-technician cost for the rollout to \$0 and reached 800+ locations with zero production failures.
- Modernized a self-service Android application from Java on Android 7 to Kotlin on Android 13 while preserving print, payment, scanner, and store-network workflows.
- Built real-time printer status-light monitoring and Splunk dashboards for issue duration, frequency, and production diagnosis.

General Motors · Sr. Mobile Device Software Developer

Jul. 2021 - Jul. 2022

Remote

- Built a web dashboard that used Jenkins pipeline data to track Android and iOS app-size changes, and deployed mobile build and release pipelines in Azure DevOps.
- Created a Universal Deep Link Handler in React Native to consolidate routing, improve user flow, and make future mobile development easier.

Syntax Tutoring · Founder and CEO

Aug. 2021 - Jan. 2024

Foxborough, MA

- Founded a programming tutoring company and designed practical Android and web curricula, interactive applications, lectures, and hands-on labs.

PROJECTS

Barcode Scanner | Kotlin, Jetpack Compose, MVVM, Coroutines, NanoHttpd, LiveData

- Built the company's first Kotlin Android application with a tablet-hosted local server and physical scanner; automated 65 POS tests, increased POS automation by 55%, and won first place in the 2025 company hackathon.

TabTally | Kotlin Multiplatform, Compose Multiplatform, ML Kit, Vision, Groq, SQLDelight

- Designed and built a shared Android and iOS receipt-splitting product with on-device OCR, strict-schema AI extraction, editable review, and deterministic split calculation.

EDUCATION

University of Massachusetts, Lowell · Bachelor of Science in Computer Science

Dean's List Recipient
